Region 5 700 MHz Allocation Plan V6 4 11-05-2010 FINAL.xlsx (158KB)

I have reviewed the documents dated 11-5-2010 that were attached to your email requesting Region 6 concurrence to proposed changes to the Region 5 Plan. The changes involve channel assignments to [Riverside County](#), [Orange County](#), Los Angeles County and [Los Angeles World Airports](#). The proposed changes do not affect the Region 6 Plan. Region 6 concurs with the proposed changes.

John Lemmon

Chair

Region 6 700 MHz Regional Planning Committee

Subject: Region 5 700 MHz plan change

John- Attached is a proposed change to the Region 5 700 MHz allotments. There is a change to an allotment for [Imperial County](#) that We would like your concurrence on. There added allotments for [Riverside County](#) for "fill-in" sites. We define those as allotments that are not usable in all parts of the agencies coverage area and must be engineered in on a per site basis. None of the proposed sites are within 100 miles of the Region 6 border and if that were to change of course we would seek your concurrence.

Riverside is under some tight project schedules so I'm trying to expedite this change through the FCC approval process. I have filed the change with the [FCC](#) and need to amend the request with your concurrence ASAP.
